

## Squirrel Monkey 7 Fun Facts...

They love being in trees, in fact they spend 99% of their time in them.

The squirrel monkey is one of the smallest primates on the planet.

They use their tails to keep their balance moving through the tree tops.

They eat flowers, bugs, lizards, eggs, and nuts to name a few.

They have excellent eyesight and can spot colored fruit in the trees from long distances.

They live in large groups called Troops.

They live up to 15 years in the wild and 20 years in captivity.
